

Unit 6A – Multimedia presentation

Level 5

Pupils plan their tasks for purpose and audience. They combine a variety of information and media when creating, refining and developing their own ideas and information. Their presentations are fit for purpose and meet the needs of their intended audience. They search for and select information from a range of sources, considering relevance, plausibility and accuracy. Pupils create their own databases and search or sort on more than one field to follow particular lines of enquiry. They create their own models or simulations and investigate the effect of changing data. They use ICT to send and receive files electronically. Pupils form opinions about issues raised by the use of ICT and are aware of dangers associated with misuse of the internet/related technologies. They recognise the implications of using networks.

Teacher commentary:

In this unit children compile a powerpoint presentation about themselves as part of a transition project as they move to highschool, by way of introducing themselves to their new teachers and new classmates. They combine photo, video, audio and written work in the presentations, which they then present to their current class. The project includes information about their interests and hobbies which are researched on the internet. The pages are hyperlinked to allow the presenter to move through the presentation easily.

The projects are developed and refined over a period of time.

These powerpoints are sent to their highschool, where they refine and improve the work further in Year 7.
